OSTEOMED

BONE HEALTH

- Helps develop and maintain bone
- Helps in the absorption of calcium
- May help prevent bone loss/osteoporosis
- Helps in cartilage formation
- Helps build strong bones and teeth

Ideal whenever calcium is needed and must be rapidly absorbed.

The assimilation of calcium and the nutrients necessary for its deposition work together to achieve effective remineralization of bone

UPDATED FORMULA

WHAT HAS CHANGED?

- ✓ Higher total elemental Calcium
- ✓ Increased zinc to support bone formation and Vit D activation
- ✓ Increased Vitamin D for improved Calcium absorption
- ✓ Marine DNA and strontium removed to make room for more calcium
- ✓ New Health Canada terms: Calcium hydroxyapatite now called Durapatite; calcium glucarate now called saccharate

Each capsule contains/Chaque capsule contient :
